**Job title:** Maintenance Technician

**Location:** Rousset (13), France

**Company:** NAWAH France

**Type of contract:** Permanent contract

## About NAWAH

NAWAH is at the forefront of architected nanomaterials, harnessing the unique potential of vertically aligned carbon nanotube (VACNT) technology. Our materials open new horizons in next-generation composites, fuel cells, and electrolyzers.

From our facilities in Rousset (France) and Dayton, Ohio (USA), we design and manufacture innovative solutions that are shaping the future across many industrial sectors.

The letter "H" in NAWAH symbolizes our commitment: placing Humans at the heart of our development and our transition to industrialization.

Every day, we continue our mission: to accelerate the transition to a more responsible industry by pushing the boundaries of innovation. Our story is one of a collective adventure where science meets industry to build a sustainable future.

If you want to join an innovative and unique company in its field, we would be delighted to count you among those who shape our ambition.

## Position

You will join NAWAH as a maintenance technician at our ROUSSET (13) site:

At the end of a training period on the workstation, you will have the ability to:

- ✓ Ensure the completion of maintenance activities for equipment (fault diagnosis, preventive and/or corrective actions, disassembly, installation of new equipment)
- ✓ Detect and monitor breakdowns and machine indicators (uptime, MTBF, drift...)
- ✓ Write preventive procedures and complete intervention tracking documents by recording and reporting incidents.
- ✓ Identify and report needs (spare parts and machine consumables).
- ✓ Participate in the evaluation of equipment suppliers and second sources.
- ✓ Follow maintenance protocols to ensure the safety of maintenance operations in collaboration with the HSE, Methods, and Quality teams.
- ✓ Organize maintenance interventions in compliance with safety instructions.

## Background

You hold a diploma in industrial maintenance or an equivalent qualification.

You have significant experience in the maintenance of industrial equipment, particularly in the field of mechanics.

You are familiar with CAD tools such as SolidWorks and proficient in the Office suite

Ability to work in project mode on innovative topics.

The practice of technical English is a plus.

Relevant experience in one of the following areas can be a real advantage: microelectronics manufacturing processes, CVD, heat treatment processes, roll-to-roll processes, or calcination.  
Hours: Monday to Friday / 37 hours per week, 12.5 RTT days per year.

**Other reasons to join NAWAH:**

- You work in a supportive environment. We believe that the quality of our services begins with the well-being of each team member, and our close management and regular follow-ups are key pillars of this.
- An expert work environment that collaborates with its clients and peers, allowing the boldest ideas to come to life.
- We make your professional success possible by implementing career management that meets your aspirations.
- We are committed to offering you a dynamic environment with numerous social benefits (phone and laptop, training, meal vouchers with Visa card, health insurance covered at 75%, full disability insurance, etc.).
